Social Sciences and Humanities Editors: Leading your field in Open Research?
Sarah Oates, Senior Editorial Director, Wiley
Poll: On a scale of 1-5...

how important do you think it is to make research more open in your discipline?

1 = not important at all
5 = essential

https://api.cvent.com/polling/v1/api/polls/span7yie
Open research – the benefits

☑️ **Increased openness** – making research more open, transparent and accessible for researchers, research stakeholders and the general public alike

☑️ **Increased reproducibility** – creating a more efficient and effective research landscape, whether conducting, funding or supporting research

☑️ **Increased accountability** – protects the integrity and overall reputation of research
### How open is your journal?

</table>

**20 minutes**

**5 mins:** Complete the questionnaire for your journal.

If you are happy to do so, please put your name and your journal at the top of the questionnaire.

**5 mins:** In groups of 3, discuss your answers

**10 mins:** Summarize your findings for the rest of the group
Do you preprint?
Wiley’s Preprints Policy

A preprint is a paper that is made available publicly via a community preprint server prior to (or simultaneous with) submission to a journal. Preprint servers, i.e., servers that allow for the posting of papers prior to submission for publication, are becoming more common across a range of disciplines.

Wiley believes that in communities where non-commercial preprint servers exist, journals should allow for the submission of manuscripts which have already been made available on such a server. Allowing submission does not, of course, guarantee that an article will be sent out for review; it simply reflects a belief that availability on a preprint server should not be a disqualifier for submission.

Author Compliance Tool

Use our ACT to check preprints policies of Wiley journals.
Would you share your data if asked?
Open Practices - Shouldn’t we be expecting data?

Reward and Recognition

ORCID and Open Research badges
Open Recognition & Reward

**ORCID** is at the heart of our open recognition strategy. We were the first major publisher to mandate ORCID at submission because we recognize the value in linking professional activities back to researchers so funders, institutions, and societies can identify their contributions. Many society journals still only encourage rather than mandate...

We are adding badges to articles to help show the community which researchers are taking advantage of transparent options like data sharing and registered reports.

74% of all submissions to Wiley-published journals had an ORCID ID in 2017.
Open research in Social Science and Humanities

• What can you do as Editor to publish more open research in your journal?

• How can we help you?
Poll: On a scale of 1-5 how ready are you to start piloting relevant open research initiatives in your journal?

1 = I don’t want to
5 = I’m really keen
