Video Abstracts and Video Shorts

Wiley journal authors are offered the opportunity to outline the key findings of their published article in a dynamic video.

Articles with Video Abstracts have Altmetric Attention Scores that are 140% higher than articles without video abstracts.

Articles with Video Abstracts are accessed 80% more frequently than non-video articles.

Those articles rank 33% higher than non-video articles published in the same journal...and 18% higher than papers published in all journals, according to Altmetric.
